1. Message from Managing Director Japan Heart Cambodia

2025 marked a significant milestone for Japan Heart Cambodia with the opening of the Japan Heart Children's Medical Center. More than a hospital, it is a place that delivers hope to children in need of advanced medical care while serving as a center for developing the next generation of healthcare professionals in Cambodia.
We believe healthcare is a foundation that enables people to realize their potential and contributes to the sustainable development of Looking ahead, we aim to expand the impact of healthcare professionals and knowledge nurtured in Cambodia across Asia, creating new value beyond national borders.
This achievement was made possible through the trust, partnership, and generous support of so many people. We extend our heartfelt gratitude to all who have walked alongside us.
From Cambodia to Asia—our journey is only just beginning.

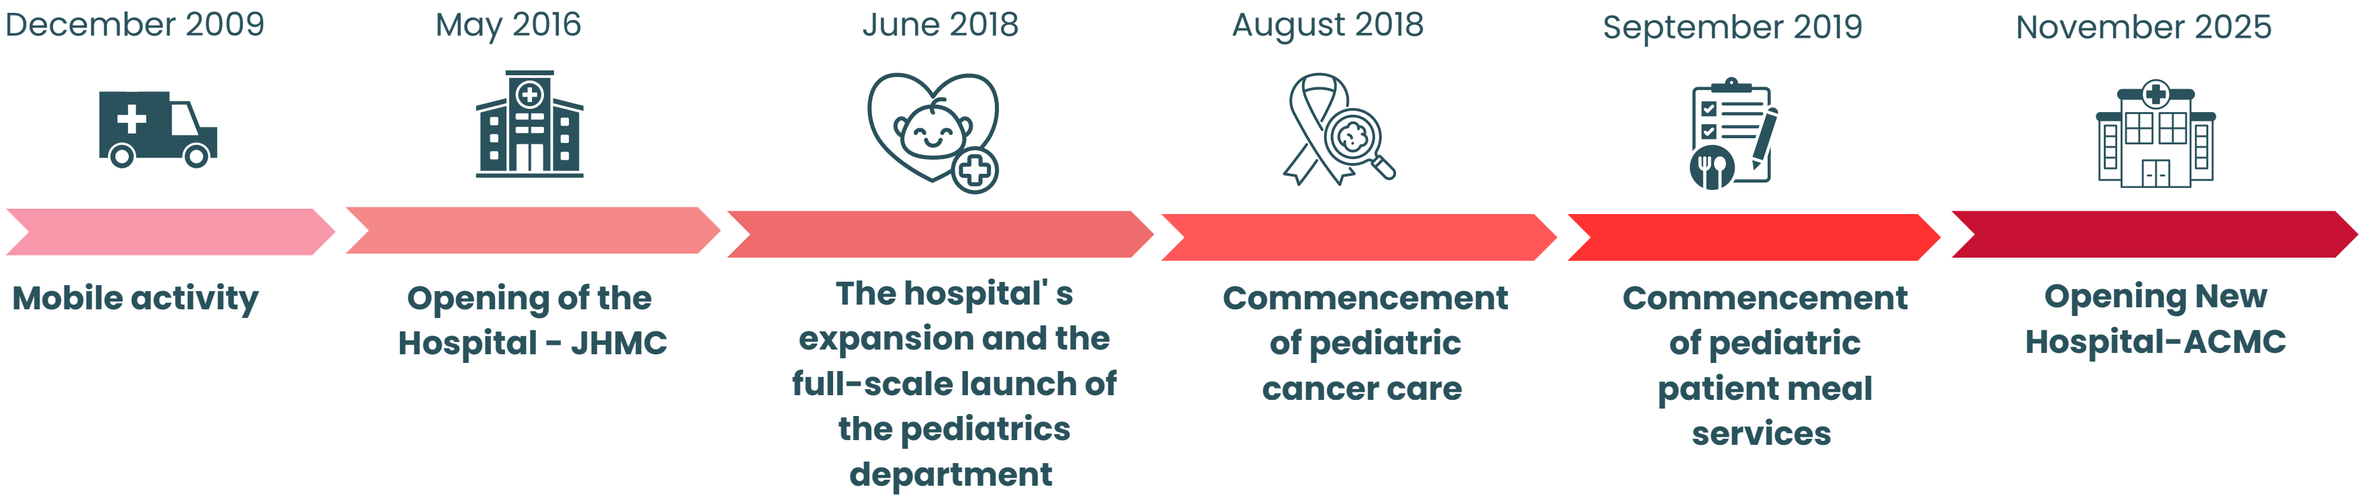

Sho Sato
Managing Director Japan Heart Cambodia

2. About Japan Heart Cambodia

Japan Heart Since 2004, Japan Heart has pursued its mission of “delivering healthcare to medically isolated areas. We work in Cambodia because major gaps in healthcare access remain. After the civil conflict, the country faced a severe shortage of medical professionals, leading to preventable deaths.

In 2009, we began providing services in a rural hospital, later establishing our own in 2016. In 2018, we have also offered pediatric cancer treatment, and 31th October 2025 with the opening of the Japan Heart Asia Children’s Medical Center in Takhmao, Cambodia. Alongside treatment, we train local doctors and aim to build a sustainable healthcare system. Our goal is a society where people can seek care with confidence that is why we continue our work in Cambodia.

Brief History

Our Vision

Build a world where everyone can be grateful for the gift of life.

Our Mission

To deliver healthcare to medically-isolated areas

Our Values

1. Value the lives of others as much as you value your own.
2. Always think about and act in ways that maximize the happiness of society as a whole.
3. Make every encounter the most valuable one.

- Chhveang Health Center
- Chrey Leas Health Center
- Tomnob Thom Health
- Kampong Luong Health
- Koh Chen Health Center
- Kompong Oos Health Center
- Ponhea Leu Health Center

Japan Heart Highlight Activities

Nutrition Service

Following the relocation to ACMC in November 2025, the Nutrition Department expanded its clinical nutrition services beyond pediatric oncology patients by introducing low-salt meals for children with nephrotic syndrome. In addition to meal provision, nutritional assessments were conducted for inpatients, and nutrition education was provided to patients and their families according to their medical conditions. Through these efforts, the department strengthened disease-specific nutrition support and contributed to improved patient care. We aim to further develop therapeutic meals for various diseases and establish a sustainable nutrition management system.

Janpan Heart Highlight Activities

Bridge of Dream Project

Guided by the principle of "**Rebuilding the nation with our own hands** " this project supports rural high school students in pursuing medical or nursing degrees. Candidates are recommended by partner schools, with family situations confirmed through home visits, and final selection made through tests and interviews to ensure strong motivation.

As of the end of FY2025, the program is supporting 20 scholarship students, including 14 general medical students, 1 student specializing in general surgery, and five nursing students. Through continuous financial and educational support, the program remains committed to nurturing the next generation of healthcare professionals and improving access to quality medical care in Cambodia.

Janpan Heart Highlight Activities

Blood Donation Event

Blood donation is one of the simplest yet most meaningful ways to save lives. Throughout the year, Japan Heart organized blood donation activities in collaboration with partners and volunteers to support hospitals and patients requiring blood transfusions. These initiatives helped strengthen the local blood supply while promoting a culture of compassion, volunteerism, and community support.

8. Face of Japan Heart

This time, we are featuring two scholarship program recipients from the second cohort. Both continue to play leading roles in supporting and driving Japan Heart forward, and we are pleased to share their stories with you.

Dr.RUN Sreynoun

I was born in the countryside of Prey Veng Province, Cambodia. When I was young, I dreamed of becoming a healthcare professional because I saw that many people in my village could not receive proper medical treatment when they were sick. Seeing their struggles inspired me to help others through medicine.
I was fortunate to be selected as a Japan Heart Scholarship student, and that opportunity helped me achieve my dream of becoming a doctor. I am deeply grateful to the Dream Bridge Project for believing in me and making this journey possible.
Nowadays, I work in the Pediatric Department at the Asia Children's Medical Center. Every day, I do my best to provide the highest quality care for my young patients and support their families.
In the future, I hope to become a good doctor with extensive knowledge and experience so that I can give back to my community and help improve healthcare for those who need it most.

RUN Sreynoun

Dr.PHAE Makara

I was born in fourth member of my family at the rural area in Prey Veng province. Actually I had seven siblings in my family but my oldest brother was died in 8 months old and my youngest sister was died after delivery. My house is far away from the hospital, my father and uncles brought my mother to Vietnam hospital By walking with hammock. I stranded behind them and crying. I couldn't do anything, I just waited my parents come back over one months. These experiences inspired me to become a doctor.
I got a scholarship and having a chance to study medical doctor for eight years through the Japan Heart Program under " Dream Bridge Project" After I reached to get my license, I have been working at Japan Heart Medical Center over two years. I was rotated for working in general pediatric and pediatric oncology department, operations member, general consultation under guidance by respectful Doctor Kojiro, Japanese Specialist doctors and Khmer senior doctors. I can treat my patients by my heart under my dream is " To help patients with efficiency and safety."

PHAE Makara
